

# Cordless Bucket Pump

## For Moving Fluids On-The-Go

- ▶ Easy, time-saving pump system for DIY users and service technicians
- ▶ Convenient, portable, cordless setup—just add your battery\*
- ▶ Multi-purpose pump for moving oil, diesel, antifreeze, or water
- ▶ User-friendly operation with approximately 3 hours of use\*\*
- ▶ Essential, and versatile equipment for any jobsite

The Cordless Bucket Pump is an essential system for maintaining equipment, where efficient and safe fluid transfer is needed for engines and machinery.

A reversible pump easily moves the diesel, oil, oily water, or water so you can change oil, winterize an outboard, or simply transfer diesel fuel from the container.

The portable and compact design easily transports from the service truck to the jobsite, and can sit on the lid of a 5-gallon bucket (bucket not included). Hoses will wrap back on the base and battery mount is compatible with Milwaukee M18™ battery pack.

The system is an indispensable addition for any service technician, fleet maintenance, or even boatowner.

### Available In:

Part #	Model #	Voltage
27-2203	GP-301-BKT-12-CM	12V DC

\*with Milwaukee M18™ battery pack.

\*\*with Milwaukee M18™ battery pack. Hours may vary depending on battery size.
