

Portable Oil Change Systems

- ▶ **Clean and spill-free**
Drain waste oil into bucket and reverse the pump's flow to fill new oil
- ▶ **Less maintenance time**
Complete several oil changes faster
- ▶ **Hand-carry setup**
Compact design to easily move between jobs and store away

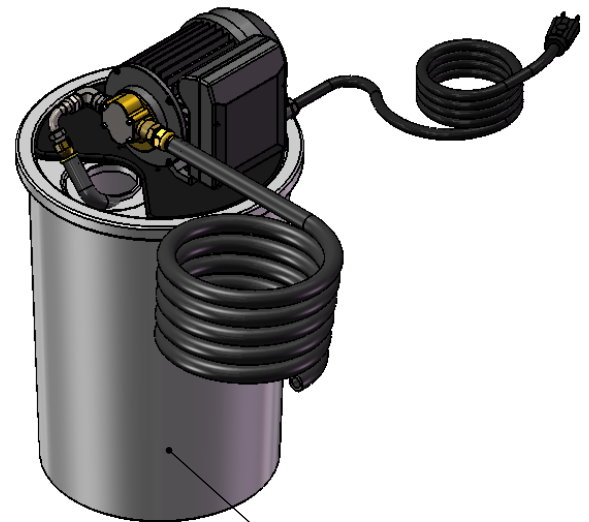

12V or 24V DC System

Making The Job Easier

Reverso's simple designs and rugged motors make the job of changing oil a trouble-free chore. Powerful pumps transfer used oil quickly and cleanly from engine to waste a container (bucket not included). The reversing capability of the pump returns new oil back to the engine with the flick of a switch.

Designed to be an easy-to-operate unit, the system eliminates slow and potentially messy hand pump operations. The 12V and 24V systems are equipped with battery clips and the 110V 60Hz AC system comes with an AC plug.

110V 60Hz System
(bucket not included)

Model	GP-301-BKT	GP-302-BKT	GP-311-BKT-10
Flow Rate	1.5 GPM 5.6 LPM	2.1 GPM 7.9 LPM	3 GPM 11.35 LPM
Voltage	12V or 24V DC	12V or 24V DC	110V 60Hz AC
Pump	Bronze Gear	Bronze Gear	Bronze Gear
