

# Single Engine Flush Kit

The **Single Engine Flush Kit** is an installed solution to bending over the transom to connect the freshwater hose. Mount the quick disconnect on a convenient flat surface so it's always easy to reach when standing in the boat or on the dock. No matter if the boat is in the water, on a lift, or on a trailer, flushing the engine can be simple for any position.

- ▶ Easy-to-reach freshwater connection to flush a single outboard engine
- ▶ Includes quick disconnect, 10' hose, and components to install
- ▶ Boat can be in the water, on a lift, or a trailer
